

# JanusOS<sup>SM</sup>

The mobile patient management system  
for housecall practice

Janus Health

JanusOS<sup>SM</sup> puts your complete practice literally in your hands, allowing you to access all the tools, technologies and services you need to deliver enhanced patient care, online and offline. JanusOS<sup>SM</sup> equips you and your housecall practitioners for:

- Real-time scheduling of housecall visits
- Paperless patient information and document management
- Remote access to unified email, voice mail and communications
- Support for portable medical and diagnostic devices
- Electronic retrieval of lab outcomes and analysis
- Electronic ordering of prescriptions, services, tests and consultations
- Centralized administration and storage of patient information
- Billing compliance, HIPAA compliance and complete audit trails
- 24x7x365 IT and operational support

Providing one mobile solution to meet all your housecall practice needs, JanusOS<sup>SM</sup> enables you to provide quality services in the home, while driving your costs down.

# How JanusOS<sup>SM</sup> enables clinicians to enhance their housecall practice through mobile patient management.

Backed by over 20 years of housecall experience and nearly 10 years of mobile WWAN IT development, Janus Health delivers the most comprehensive, **patented-protected** practice solution available to housecall clinicians — **all provided for a per-housecall fee.** While compliant technology solutions and support are our focus, the Janus Health solution includes a number of additional services from billing and accounting to mobile x-ray and CLIA support.

## **Practice Management**

**Real-Time Practice Management** Janus Health understands the challenges of the housecall scheduling process, which is why JanusOS<sup>SM</sup> was designed from the ground-up to allow you and your clinicians to respond to more housecalls, more quickly. By integrating with Microsoft Outlook® and Adobe Reader®, you can start each day with confidence knowing that JanusOS<sup>SM</sup> will enable you to practice medicine compliantly online and offline without being limited by wireless internet connectivity and/or speed.

**Simple Scheduling** Save critical patient health and map information into Outlook appointments with a single mouse-click; send instant notification of scheduled housecalls via email including time and location of housecall, patient demographics, medical symptoms and map routing.

**Familiar Tools** Scheduling functions are performed using intuitive interfaces and familiar tools.

**Maps and Directions** Optional interface with Microsoft MapPoint® available for GPS routing and driving guidance

**Follow-Ups** Utilize housecall activity reporting for easier tracking of follow-up visits and clinician activity.

**Patient Management Portal** Quickly "smartsearch" your entire practice to locate patient demographics (including maps) and records using any standard internet browser.

## **Paperless Patient Care Management**

JanusOS<sup>SM</sup> enables housecall clinicians to quickly, securely and accurately manage patient information and documentation right at their patients' bedside, online and offline.

**Tablet PC and laptop-compatible** Whether it is a keyboard, stylus, dictation or speech recognition software, housecall clinicians can make notes and update information in the manner most comfortable for them.

**Paperless Environments** Physicians can use JanusOS<sup>SM</sup> to leverage the benefits of electronic faxing and unified messaging without the hassle of another piece of software or username and password.

**Printable Reports** Patients can sign consents electronically so physicians are freed from carrying piles of paper in their vehicle (Physicians may also sign home health, DME and other orders electronically putting a halt to the paper chase.)

**Centralized Storage** All patient information is stored and backed up in a centralized location, offering physicians and their entire practice 99.9% up-time to ensure HIPAA-compliant productivity and peace-of-mind.

**Electronic Ordering** Write prescriptions, order labs, medical equipment, home health services and other consultations electronically so patient care is provided more quickly, accurately, and efficiently.

**Avoid Capital Cost** Eliminate the costly office-based server, software purchase and IT support.

**Medicare Compliance** Janus Health puts each chart through a rigorous Medicare compliance evaluation so you can make housecalls with confidence.

## Mobile Diagnostics

JanusOS<sup>SM</sup> supports a range of portable medical devices that allow housecall physicians to deliver the same clinical services available in hospital labs and ERs. These mobile devices, many small enough to fit in your hand, enable you to treat more patients more cost effectively in the home.

### JanusOS<sup>SM</sup> supports:

- Portable X-ray, Digital and Analog
- BIO "Z" cardiac output monitoring
- Pulse oximeters
- Lab analyzers
- Portable ultrasound machines
- EKG

### JanusOS<sup>SM</sup> enables clinicians to:

- Electronically retrieve and capture outcomes and analysis without using 3rd-party EMR software
- Capture lab work and diagnostic results in an easy-to-read, printable format
- Electronically update patients' records real-time so providers look at the most up-to-date information
- Practice medicine online and offline
- Leverage Janus' secure, compliant mobile platform by integrating with standard Windows and Office applications
- Use a tablet or laptop confidently, knowing free support is just a phone call away.

Consultations

Hospital Admission

**After two decades of housecalls in multiple cities, we have faced the problems, learned the solutions, and developed the wireless infrastructure that meets your unique practice requirements.**

Janus Health has pioneered the first adoption of mobile technologies for use in housecall practices. While operating a housecall medical group, Janus Health's management amassed over 300,000 housecalls, as well as a trusted reputation within the physician community.

Leveraging this first-hand understanding of the complexities and challenges of housecall practices, Janus Health develops innovative and patented mobile technologies that allow housecall physicians to bring an exceptional level of health care to the home, for only a per-housecall fee.
